Introduction

Before we get started, let me just say something...

If you think this is 'another free report', think again!

This report is unlike others. It's a **meaty report** packed with content that is sure to light a fire under your online business!

Imagine waking up to a ton of "Payment Received" emails in the morning, every morning. Imagine doing this over and over again with your own Internet money machine. **This is possible if you put into action just some of the secrets outlined in this report!**

Are you ready? Ok, let's get started!

By the time you put some of these secrets into action, you will have more fun profiting from your Internet business than you did building it!

Let's begin...

Secret #1: The Quick And Easy 5-Minute Niche Research System!

If there is one lesson that I have learned well, it is this: The money is in the niche. Even without a subscriber list, it's still possible to make wads of cash online. But without a hyper-responsive niche, a business is a dead duck.

I'll go through the step-by-step method I use to uncover profitable niche markets, often in as short as 5 minutes.

Step 1: Go To Amazon

Amazon is the world's biggest online bookstore, and a goldmine of niche research information. Check out which are the current bestsellers. Are there many weight loss books or wealth management books? See which are the current hot topics that people are buying.

Step 2: Go To Magazines.com

Now that you've found a few niches that are potentially profitable, it's time to scope it out further a little. Visit magazines.com to see which magazines are popular. If a company is willing to produce a new issue each and every month, it means they are in profit and the niche is hot. Strike on it!

Step 3: Keyword Research

Now that you have a few niches in mind, go to a good keyword research website like freekeywords.wordtracker.com to get a feel of how many searches are done per month for that niche. For example, if your niche is fly fishing, type in 'fly fishing' and see how many results there are. You are looking for at least a few thousand searches a month. Decide which niche you want to go with, and move on.

Step 4: Visit The Forums

Go visit the forums in your niche. It's time to discover the problems your target market is facing. After all, to make a profit, you need to create a product that solves problems. Discussion forums are a great place to find these problems. (Hint: Warrior Forum?) In short: Keep an eye on hotly discussed topics.

Secret #2: Using Articles As Your Ultimate Traffic Generator!

Using articles to generate traffic is simply one of the best methods. By using the link in the resource box, you can attract lots of visitors. Article submission is free, and article marketing is certainly a great way to drive lots of traffic to your site.

Articles are great traffic generators simply because of their viral capabilities. **A single article can be published in many places because ezine publishers look to article directories for fresh content.** Try to write at least a couple of articles every week.

Write articles and post them at article directories like Ezine Articles for a flood of traffic. **If you just write 5 articles every week, you'll have 250 articles promoting your website after a year.** Article marketing also has a viral effect. Ezine publishers, bloggers and webmasters often grab content from article directories, and by grabbing your article; they would have to leave your resource box (where you link should be) intact. So one article can potentially get hundreds of visitors to your website.

Advanced Tip - A 'Secret' Method To Get 10x More Article Traffic!

Here's how to explode your views per article on Ezine Articles:

1. Go to Yahoo Answers and find questions that relate to your article. For example, if you have an article "3 Tips For Better Golf Swings", type golf swing in Yahoo Answers and look at the topics.
2. Reply to the topics with ONLY the first paragraph of your article. (Leave them hanging on for more!)
3. Link to the article in your answer if they want to find out more.

This gives your article...

1. More page views
2. Which will give it a better chance to appear on "Most Viewed EzineArticles (90 Days)" for the category your article appears in.
3. **Here's where your article traffic will explode, because this "Most Viewed" link appears on ALL the articles in that category. You can easily get hundreds/thousands of visitors within days.**

And that's when all the good stuff happens: more affiliate commissions, more opt-ins, more sales, more ezine publishers using your article etc.

You can also link to your articles in forum posts/signature files and increase your views per article even more!

Secret #3: How To Get Listed On Google And Other Search Engines In Record Time!

One of the top problems webmasters face is getting into the search engines quick and ranking well. The reason is that they over complicate things and thus even risked being delisted from the search engines because of these complicated, blackhat methods.

The main component of good Search Engine Optimization is to gain quality backlinks.

Here is a quick and easy way, which you can accomplish in one hour, to allow you to appear in Google's search engine quickly:

Step One

Create a blog at all these places - Blogger.com, Wordpress.com, MySpace.com, Spaces.msn.com, Tripod.com, Pages.google.com

Step Two

Post some useful content on all these pages, then post one link back to your site.

Step Three

Ping all these blogs at these places - Pingomatic.com, Pingoat.com, Pingtheempire.com.

Step Four

Watch your site appear in Google's rankings in as little as one week!

Step Five

Post to your blogs once every two or three weeks to give it fresh content that the search engines will love.

This system is a surefire way to get listed quickly. You are leveraging on the high Pagerank (the algorithm which Google uses to judge sites) of those blog sites and getting backlinks to your site, which are the key to getting ranked well on search engines. Each backlink acts as a sort of vote to your site. If you take a look at Blogger.com's Alexa ranking, it is one of the top-ranked sites in the world. Instead of waiting months to get listed, do it in one week!

Secret #4: How To Pull In Tons Of Hassle-Free Traffic And Profits From Classified Ads!

Classified ads are just as effective online as they are offline. I know of a few marketers who make their living solely from posting these tiny, little ads. Why are they powerful? Because they reach out to a highly targeted audience.

Whenever we pick up the Classifieds section of the newspaper, we are in a frame of mind to take action. We are not "cold" to ads at that point of time. We are actively seeking ads that cater to our wants and needs! This can be powerful information if you are a marketer.

So how do you pull in big money with these tiny ads? Here's the lowdown:

1. Your **headline** is the key. It's the first thing your target customers will see. Make sure your headline is benefit-filled and uses attention-grabbing phrases like "limited time only" and "brand new". Be creative and test your headline to achieve better results over time.
2. Don't have your own product? Join an **affiliate program**. This way you don't have to create a product. All you need to do is create an affiliate link to promote the merchant's product and you can make commissions from every sale. Advertise your affiliate link in the ad.
3. Submit your ad to the top classified ads sites. These include **Craigslist, US Free Ads, The Yellow Pages** and **MySpace Classifieds**. The combined traffic pulling power of these sites is guaranteed to give your ad huge exposure!

Writing a killer headline doesn't have to be difficult if you follow these proven templates which have stood the test of time:

1) How To _____

This is the classic 'How To' headline. This always works because people are always looking for some sort of how to information that can help improve their lives, save time, save money, or make money. Whenever you are stuck for headline ideas, using a 'how to' headline always works.

2) Imagine _____

The ‘imagine’ headline works well because it makes the reader form pictures in his mind. It makes the reader envision the benefits he will get if he purchases your product. This makes your offer very appealing indeed.

3) Secrets Of _____

People always want to know secrets. If you have some information which very little people know about, this is a headline that can work very well. The word ‘secrets’ is a power word that again draws up imaginations.

4) Who Else Wants To _____?

This headline is a powerful one. By asking ‘who else wants to’, you are implying that someone has already done what your product promised to do. Also, people like to follow the crowd so they would want to know what they could be missing out on.

5) Announcing _____

This gives your offer added importance. The word ‘announcing’ implies that there is something so important that you are ‘announcing’ it. It implies that you have benefits to offer a large group of people. It also gives your offer ‘newness’.

These 5 headline templates are among the most effective of all time. Use them wisely.

Secret #5: Getting Eyeballs Glued To Your Ads!

Advertising in classified ads, pay per click ads or just forums? This article will look at 5 simple methods to increase the responsive of your ad. In marketing, it's simple changes that make a big difference to your bottomline. Here are the 5 killer techniques you can apply immediately:

1. Use capital letters at the beginning of every word in your headline. This simple technique puts emphasis on the headline and draws attention to it.
2. Ask people a question in your ad. In school, we were all taught to answer questions so this is a very effective technique to keep them hooked to your ad.
3. Use the color red for your headline and sub headlines. Tests have shown that red headlines out pull other colors many times over. Red is a color of passion, so it draws attention immediately.
4. Bold or italicize your keywords for added emphasis. If all your words looked the same, your ad will become very monotonous so use these simple techniques to spice up your ad.
5. Use lots of white space in your ad. This keeps your ad looking neat and uncluttered. A cluttered ad is a poor ad..

These 5 techniques may sound simple, but you'll be amazed at how many ad writers don't use them. The most successful ads in newspapers, online or even television use two or more of these techniques.

Secret #6: Killer Ways To Create Your Ebook In As Little As 1 Day!

Creating an ebook is remarkably simple once you follow proven systems! Here are 3 simple yet powerful ways to create your ebook in the next 24 hours:

1) Outsource your ebook creation

Outsourcing is one of the secret weapons of successful ebook publishers. They simply go to a website such as Elance or Get A Freelancer and post a project. Make your project as simple as possible, and the bids will come pouring in. Survey the bidders' reputations, and choose your 'hired gun'!

2) Unleash resale rights

What are resale rights? Resale Rights are rights that you purchase from an ebook creator that allows you to resale the product under your name! This is the probably the fastest way to having your own ebook business up and running. You can acquire these coveted rights from resale rights membership sites or even on eBay. However, do remember that a resale rights product that costs just a few cents has probably been sold on many times and there are many copies around the Internet. Good resale rights products often command a premium price.

3) Interview an expert

Find an expert in your niche and interview him or her. Voila! You have an instant product. You can find experts to interview on forums or even from searching through websites on Google. Experts love interviews because it gives them exposure and advertising for their products and business. You can do a simple email interview or an interview on an instant messaging program. If you really want to take it further, you can do even an interview on a Skype call. The expert doesn't even have to be 'top-of-the-line'; you just need to find a respected expert to get this going!

Secret #7: Cranking Out Winning Money-Making Ideas To Create Your Next Information Product!

You are itching to create a new information product. Perhaps you have created an ebook, but it didn't sell very well, for reasons you can't seem to fathom. Or perhaps you want to get your feet wet in creating your first information product.

Well, here's a wild method to find ideas for your next information product.

I'm sure everyone has posted on forums or message boards before. These are places where every discussion about every niche you want to know is available.

The Search button is your friend here. Go to all popular forums on your niche, go to the search facility and use these power root words to help you find problems in your niche, and then the content:

problem
help
solution
how to
learn
want
need
learn

You will find posts like "How do I solve this _____ problem?" "I need to learn how to _____" "A solution to _____"

This is a tactic you can use on the search engines as well. With this, you can find content that is created by experts (you have to use your finely-honed judgement and visit quality forums) The Warrior forum is one example of a quality forum in the Internet Marketing niche.

Now, if you want content for any part of your project, just simply create a new thread, make it "controversial" if possible, and you will have answers flying in left and right. You can use this content and create a controversial sounding ebook or report with a catchy title. This type of information always sells well.

Summary

In a sense, making money from the Internet goes against the grain...making a lot of money and not doing a lot of work (although you have to put in some initial work for this to happen). You just need to keep at it in the beginning! ☺

I've no doubt that now that you're armed with these secret tactics, you can start creating pulse-racing paychecks!
